

paulownia finger jointed board for door frame paulownia china finger jointed for door core

Paulownia

- 1, light and tough material**
- 2.non-curly shape**
- 3.keep dry,it has a high degree of preservation**
- 4.acid resistant refractory:**

Rot-

**resistant acid is also a unique feature of it, so the masses are about to make a coffin with P
aulownia.**

- 5.resistant to wear and tear:**
- 6.the brightly-colored texture appearance**

**Paulownia finger joint board is very good for making door cores,each separate lemella is
then the strength for pressure could increase much,keep the door steady
and good shape,below are some pictures:**
